

C++

A complete documentary.

By Prince Agarwal.
["Hello World"]

Object Oriented Programming

(OOPs)

**Rules are defined :-
To drive a car**

- 1. Follow the traffic light**
- 2. Don't speed up.**
- 3. Avoid drunk and drive**

Object Oriented Programming

(OOPs)

**Rules are defined :-
To write a code**

*** This is pre-defined Rules in order to create a code.**

- 1. Code show less error.**
- 2. Execution time is less**
- 3. Code is efficient**

Oops contains following Properties : -

- 1. Encapsulation.**
- 2. Inheritance**
- 3. Polymorphism**
- 4. Abstraction**
- 5. Overloading**

Student

I want to store his Information →

String name ;
Int age ;
Int std;

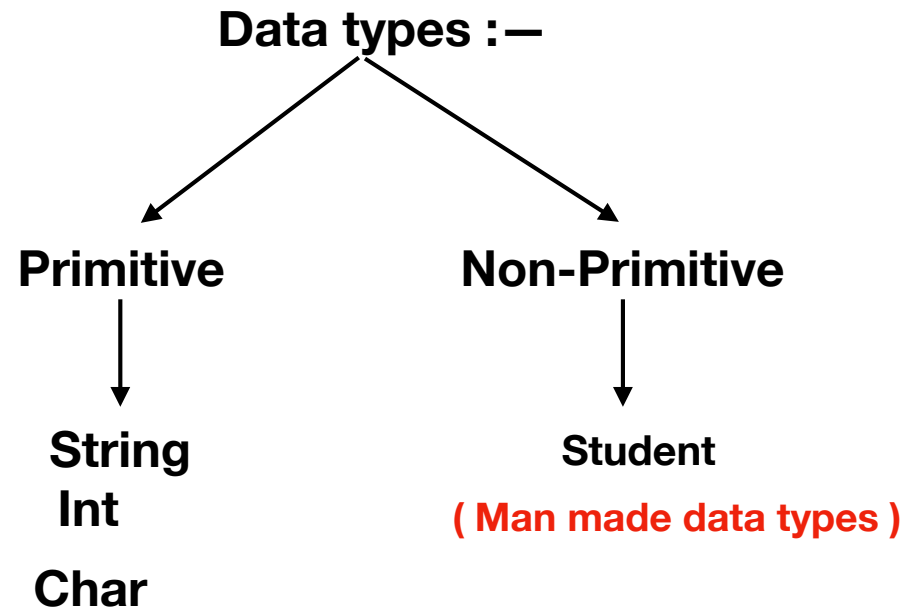

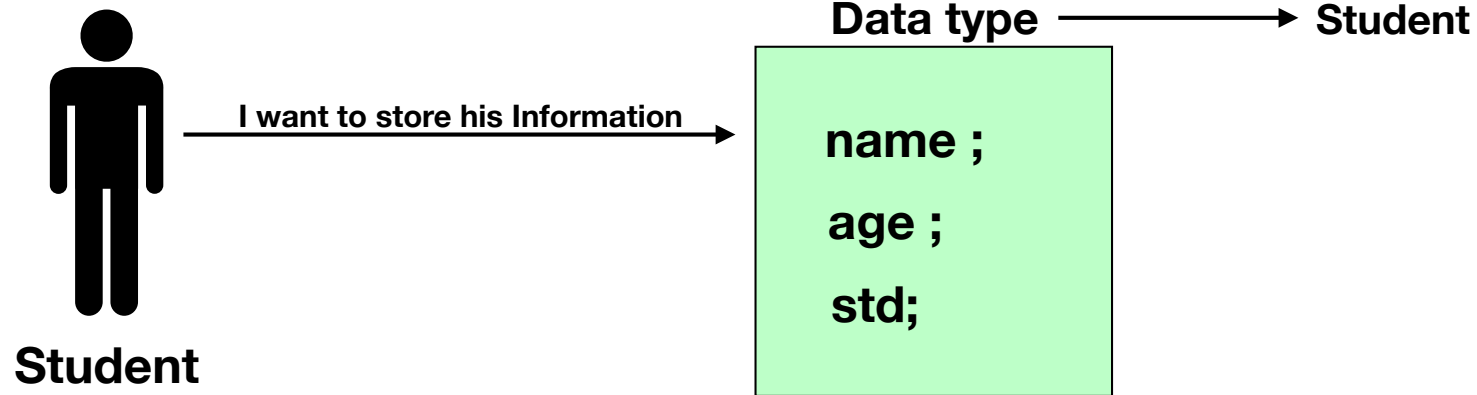

Student

I want to store his Information →

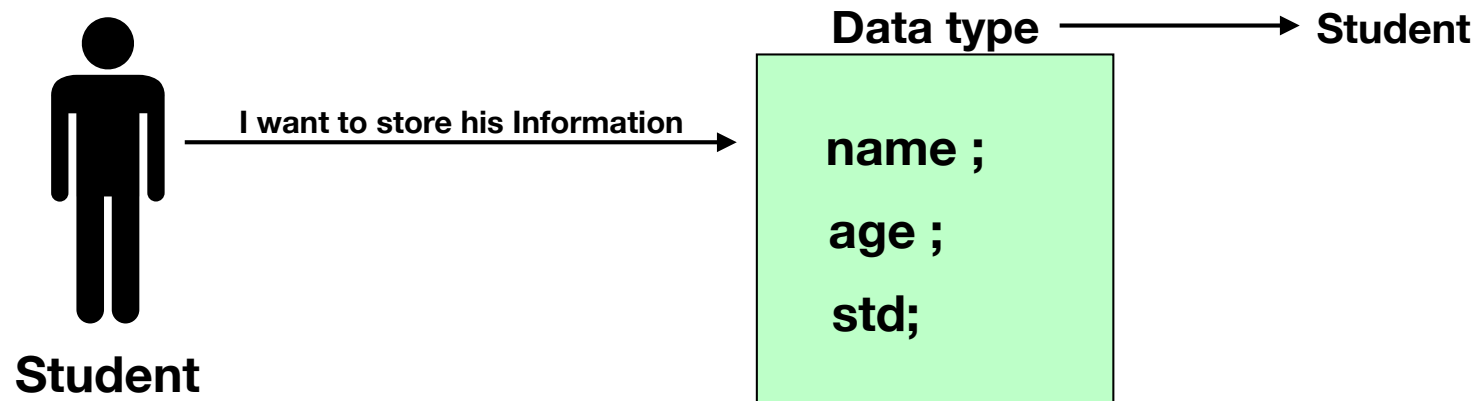

String name ;
Int age ;
Int std;

Lots of students

We want to make data types in our accordance

**There are too many features are
Added .**

Data types : —

String
Int
Char

Students
x y z ...

(Man made data types)

```
#include<iostream>
```

```
Int main()
```

```
{
```

```
int num;
```

```
}
```

Data types
(Inbuilt)

Variables

num

```
#include<iostream>
```

```
Int main()
```

```
{
```

```
Students num;
```

```
}
```

Data types
(man made)

Objects

num
